

## RG65 UK National Class Association

Annual General Meeting  
3 March 2021

### **Motion 3**

The RG65 NCA Committee propose a motion to add an Appendix to the 2014 RG65 Class rules which allow boats that are compliant with the "IRSA 65" Class Rules to participate in all events organised by the RG65 UK National Class Association. This Appendix will expire when an updated version of the RG65 Class Rules is published.

### **Background to this Committee Motion**

The IRSA 65 Class is seen as compliant with the current RG65 Rules as it is a subset of the RG65 rules, with a limitation on total keel depth and rigs/sails (max 3) that should be measured by a measurer. The Committee therefore believe that boats which conform to the IRSA 65 Class Rules should be allowed to sail at all events organised by the RG65 UK National Class Association.

The Committee therefore wish to propose an Appendix to the RG65 2014 class rules to allow this class of boat to compete alongside boats that conform to the RG65 Class Rules as they are not seen to have any advantage and may be at a slight disadvantage.
